OPENSSL

UNIVERSITÀ DI PISA

Website

The website of reference for OpenSSL is:

www.openssl.org

(how original...!)

There are plenty of guides online to install OpenSSL on different devices and OSs.

You can freely choose where to install OpenSSL, develop, compile, and run programs during this course!

HOWEVER

UNIVERSITÀ DI PISA

Constraints

You **must** install and use OpenSSL v1.1.1 or higher:

But not OpenSSL 3.0 or higher!

We **will** evaluate your project on a **Virtual Machine**
which mounts **Ubuntu 18.04 LTS** and **OpenSSL 1.1.1**

UNIVERSITÀ DI PISA

Recommendation

If you can, we suggest to create a VM of your own,
mounting **Ubuntu 18.04 LTS** and **OpenSSL 1.1.1**
